Legal Disclosures & Important Information

Paradiem, LLC is a Registered Investment Advisor.

This presentation is provided for informational and educational purposes only and is intended solely for the recipient. It is not intended as, and should not be construed as, personalized investment advice, a recommendation, or an offer to buy or sell any security or to adopt any investment strategy.

Any references to investment strategies, portfolio construction, or planning concepts are general in nature and may not be suitable for all individuals. Investment decisions should be made based on an individual's specific financial situation, objectives, risk tolerance, and time horizon, and in consultation with appropriate financial, tax, and legal advisors.

All investing involves risk, including the potential loss of principal. Past performance is not indicative of future results. Any forward-looking statements, projections, or scenario analyses are hypothetical in nature, subject to significant limitations, and do not reflect actual results. There is no guarantee that any investment objective or strategy will be achieved.

Where performance results are shown or discussed, additional information regarding calculation methodologies, time periods, benchmarks, and material assumptions is available upon request. Any comparisons to benchmarks or indices are provided for illustrative purposes only, and such indices may differ significantly from the strategy described.

Paradiem, LLC may utilize third-party data, research, or tools believed to be reliable; however, the accuracy and completeness of such information cannot be guaranteed. Any opinions expressed are as of the date of the presentation and are subject to change without notice.

Advisory services are only offered to clients or prospective clients where Paradiem and its representatives are properly licensed or exempt from registration.

Additional information about Paradiem, LLC including its Form ADV Part 2A (Firm Brochure), is available upon request or at www.adviserinfo.sec.gov.

Family Capital Architecture

We identify the gap between:

What your wealth is doing today
PRESENT STATE

What it was designed to accomplish
INTENT

How it will impact your family across generations
LEGACY HORIZON

Hidden Tax Exposure

Unrealized tax liabilities that
erode generational value

Structural Inefficiencies

Disconnected advisors, misaligned
strategies

Misaligned Capital

Assets not deployed toward your
actual intentions

Cost of Inaction

What does staying where you are
actually cost you?

Family Capital Architecture

We identify the gap between:

What your wealth is doing today
PRESENT STATE

What it was designed to accomplish
INTENT

Family Capital Investment

We don't INVEST.

We INTENTIONALLY OWN
EXCELLENT COMPANIES.

The distinction matters. Investors react to markets. Owners build enduring value with conviction.

3 Principles of Family Capital Investment

01

Think Like an Owner

EXCELLENCE EVALUATION

Innovation

Creating products/services that benefit consumers?

Inspiration

Driven by legacy purpose contributing to human flourishing?

Infrastructure

Solid foundation of sound business practices and structure?

02

Simplicity Over Complexity

OUR OWNERSHIP STRATEGIES

25 Stock Dividend Strategy

Income-focused ownership of 25 high-quality companies.

25 Stock Growth Strategy

Growth-focused ownership of 25 high-conviction companies.

Research-backed

Quality over quantity — conviction over diversification.

03

Research Reveals Opportunities

CONVICTION-BASED DECISIONS

Deep Analysis

Fundamental research uncovers businesses others may overlook.

Un-Common Sense

Current economic environments guide decisions and allocations.

Clear Entry/Exit

Defined criteria for when to act — and when to hold.

THINK LIKE AN OWNER

An Owner's Lens

Every business you own, evaluated on the three questions a true owner asks.

Innovation

Creating products and services that benefit consumers?

6.2 / 10

Holdings broadly serve growing, real-world demand.

Inspiration

Driven by long-term vision, not distracted by the issue of the day?

10 / 10

A meaningful share carry exposure to activities facing long-term structural headwinds.

Infrastructure

Built on a solid foundation of sound business practices and structure?

8.6 / 10

Most holdings rest on durable balance sheets and disciplined governance.

Illustrative scorecard for discussion. Each holding is scored across the three ownership criteria; figures shown are representative.

Paradiem, LLC is a Registered Investment Advisor. Performance is based on actual client accounts that are invested in Paradiem's Dividend strategy. Past performance is no guarantee of future results. Returns presented include the reinvestment of all income. Gross-of-fee performance includes trading expenses and custodial expenses. Net-of-fee performance includes actual account-level gross returns, less a model investment management fee. The model fee is deducted monthly from composite returns at the rate of 1/12 of Paradiem's highest annual fee tier. The highest rate of our annual fixed fee is 1.5%. The iShares Russell Mid-Cap Value ETF index measures the performance of the mid- capitalization value sector of the U.S. equity market, as defined by Russell. The fund generally will invest at least 80% of its assets in the component securities of its index and in investments that have economic characteristics that are substantially identical to the component securities of its index and may invest up to 20% of its assets in certain futures, options and swap contracts, cash and cash equivalents. The iShares Select Dividend ETF fund generally will invest at least 80% of its assets in the component securities of its underlying index and in investments that have economic characteristics that are substantially identical to the component securities of its underlying index. The underlying index measures the performance of the U.S.'s leading stocks by dividend yield.

Proposed Portfolio Performance

10.93%

Total Potential Return

9.28%

Potential Annual Return

1.65%

Annual Dividend Yield

Potential performance was calculated using an average of Riskalyze's four measurements: Average Annual Return, Last 10 Years, Last 30 Years, and Long-Term Consensus. Long-term consensus uses an average of 10.4% for the S&P 500, Obps change in the Ten-Year US Treasury Rate, and correlation and volatility data from 2008 to present. Riskalyze uses actual historical data to calculate the statistical probabilities shown. For securities calculated using Average Annual Return, the Average Return will be calculated using actual price history from June 2004-present or inception. We calculate the annualized return number as $(\text{final price} / \text{initial price})^{1 / \text{number of years}} - 1$. Riskalyze does not provide investment analysis on investments with less than 6 months of historical performance. In instances where an investment's inception is more recent than January 1, 2008 and greater than 6 months Riskalyze will use correlation statistics from the investments actual trading history to extrapolate missing volatility data. In most cases the extrapolation calculation increases the risk presented in the investment analysis as a means of protecting the investor. Investments with an inception more recent than January 1, 2008 are highlighted with an information icon. The Six Month 95% Probability Range is calculated from the standard deviation of the portfolio (via covariance matrix), and represents a hypothetical statistical probability, but there is no guarantee any investments would perform within the range. There is a 5% probability of greater losses. Riskalyze does not use any Monte Carlo or any other type of simulations.

The underlying data is updated as of the previous day's market close price, and the results may vary with each use and over time. The investments considered were determined by the financial representative.

IMPORTANT: The projections or other information generated by Riskalyze regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. These figures may exclude commissions, sales charges or fees which, if included, would have had a negative effect on the annual returns.

Abrams Family — Lifeboat Drill

95% Probability Range — 6-Month Horizon

The 95% Probability Range was calculated using a long-term average of 10.4% for the S&P 500, 0bps change in the Ten-Year US Treasury Rate, and correlation and volatility data from 2008 to present. Riskalyze uses actual historical data to calculate the statistical probabilities shown. For securities calculated using Average Annual Return, the Average Return will be calculated using actual price history from June 2004-present or inception. We calculate the annualized return number as $(\text{final price} / \text{initial price})^{1 / (\text{number of years})} - 1$. Riskalyze does not provide investment analysis on investments with less than 6 months of historical performance. In instances where an investment's inception is more recent than January 1, 2008 and greater than 6 months Riskalyze will use correlation statistics from the investments actual trading history to extrapolate missing volatility data. In most cases the extrapolation calculation increases the risk presented in the investment analysis as a means of protecting the investor. Investments with an inception more recent than January 1, 2008 are highlighted with an information icon. The Six Month 95% Probability Range is calculated from the standard deviation of the portfolio (via covariance matrix), and represents a hypothetical statistical probability, but there is no guarantee any investments would perform within the range. There is a 5% probability of greater losses. Riskalyze does not use any Monte Carlo or any other type of simulations.

The underlying data is updated as of the previous day's market close price, and the results may vary with each use and over time. The investments considered were determined by the financial representative.

IMPORTANT: The projections or other information generated by Riskalyze regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. These figures may exclude commissions, sales charges or fees which, if included, would have had a negative effect on the annual returns.

Family Capital Gap Analysis & Blueprint

*Is your family & capital aligned to sustain 100+ years
— or exposed to silent erosion?*

100-Year Vision Clarity

Defined multi-generational intention, alignment, and legacy purpose

Family Preparedness

Spousal alignment, next-generation readiness, governance structure

Capital Architecture

Asset alignment, tax exposure, liquidity, generosity optimization

Risk & Opportunity

Hidden vulnerabilities, concentration blind spots, leverage opportunities

PHASE 1

Structural Diagnostic

Recent tax return, current balance sheet, legal and trust docs, income streams & liquidity structures

PHASE 2

Family Alignment Review

Three focused alignment surveys, 90-min strategic interview, spousal & leadership alignment review

PHASE 3

Capital Architecture Modeling & Roadmap

Structural capital analysis, risk & erosion modeling, investment guidance, tax & transfer opportunity identification, generational impact planning

Engagement Investment

\$1,000

Family Capital Gap Analysis & Blueprint

Is everything set up to take care of you for life — and is anyone watching for what you can't see?

Dependable Income

Sustainable withdrawals, inflation protection, cash-flow confidence

A Clear Picture

Cash flow, assets, and accounts coordinated into one view

Protection & Advocacy

Guidance on wills, directives, beneficiaries, and the gaps you might miss

Family Preparedness

Spousal alignment, heirs' readiness, and who's ready to step in

PHASE 1

Financial Picture Review

Current accounts, income sources, balance sheet, and legal documents, gathered in one place

PHASE 2

Goals & Alignment Review

A focused strategic interview into your income needs, wishes, and concerns; spousal & leadership alignment review

PHASE 3

Capital Architecture Roadmap

Income strategy, protection gaps addressed, investment guidance, and a clear path forward
